

Sofia Almqvist, MSc, PhD

Sofia Almqvist, MSc, PhD,
is a Scientist at the wound care company Mölnlycke Health Care AB and is working with evaluation of external product concepts. Sofia defended her doctoral thesis in May 2011 within the area of Biomaterials at the Department of Biomaterials at the University of Gothenburg, Sweden. The doctoral thesis aimed at elucidating the mode of action of a candidate product for wound treatment with a special interest in the interaction between dermal cells and extracellular matrix proteins. She has a MSc in Engineering Biology from Linköping Institute of Technology, Sweden, with a major in Biomaterials and has previously worked at the R&D department at Mölnlycke Health Care in development of bioactive products and as project leader for the Delta project at the Institute of Biomaterials and Cell Therapy (IBCT).
